

MILKSAVER GROWER MEAL 18%

with Bovatec® 20CC, ACVM A009679

FOR RUMINANT TREATMENT ONLY

Contains lasalocid sodium at 90g/tonne (90mg/kg) of feed.

Suitable for feeding to calves from 3 or 4 days old until weaning is complete.

Indications

Control of coccidiosis and improved liveweight gain in calves.

Feeding Recommendations

Introduce this calf meal to calves at 3 to 4 days of age and gradually increase the amount fed to 1kg of meal per calf per day. Good quality hay or straw should also be provided, and clean water must be available at all times.

For control of coccidiosis and improved liveweight gain feed 1kg of this calf meal per 60kg calf per day, to provide 90mg Lasalocid (equivalent to 1.5mg Lasalocid/kg live weight per day).

Contraindications

Care must be exercised when feeding concurrently with other antimicrobials. Do not feed with other ionophores e.g. Monensin capsule, liquid or premix. Do not exceed the recommended dose rates.

CAUTION!

Dogs, horses and donkeys must not be allowed access to this calf meal as it contains Bovatec® and ingestion by these species may be fatal.

Withholding Period

Meat: Nil Milk: Cattle Nil, Goats 35 days

Typical Analysis (Dry Matter Basis)

Crude Protein 18%
