

MANETAİN

Suitable for horses that require a complete cool feed to maintain condition.

ManetaİN is an ideal maintenance mix for horses that tend to be sensitive to oats. It is a very palatable, cool energy meal style feed that is manufactured using ingredients sourced from within New Zealand where possible.

This is an oat free formula that is high in copra (to provide cool energy) and has been designed to meet the nutritional needs of horses that are in low to moderate work, and which have access to pasture. ManetaİN includes magnesium oxide, which can have a calming effect on some horses.

Typical Analysis (Dry Matter Basis)
Crude Protein 10.3%

Ingredients Selected From

Crushed Barley, Kibbled Maize, Grass Saver Pellets (Copra/Broll/Barley blend), Broll, Oaten Chaff, Zeolite, Lime, Soya/Canola Oil Blend, Magnesium Oxide, Salt, Molasses, Vitamins and Trace Minerals, Mould Inhibitor

Feeding Recommendations

Poor pasture quality - 2kg to 4kg per day
Average pasture quality - 1kg to 3kg per day

The ManetaİN ration should be split into two feeds, and be fed with roughage such as hay, chaff or grass.

Additional vitamin/mineral supplementation is not recommended (unless advised by a veterinarian) when feeding ManetaİN, due to the inclusion of a full horse vitamin and trace mineral premix in the feed.

Available in 25kg bags

CAUTION!

ManetaİN is not suitable to feed to sheep, due to the high copper levels associated with the horse vitamin and trace mineral premix included in the feed.
